

Rasuwa District Profile

UN Nepal & iMMAP

Introduction

Ward Populations in Rasuwa

15 wards affected in Rasuwa. District Headquarters labelled in red.

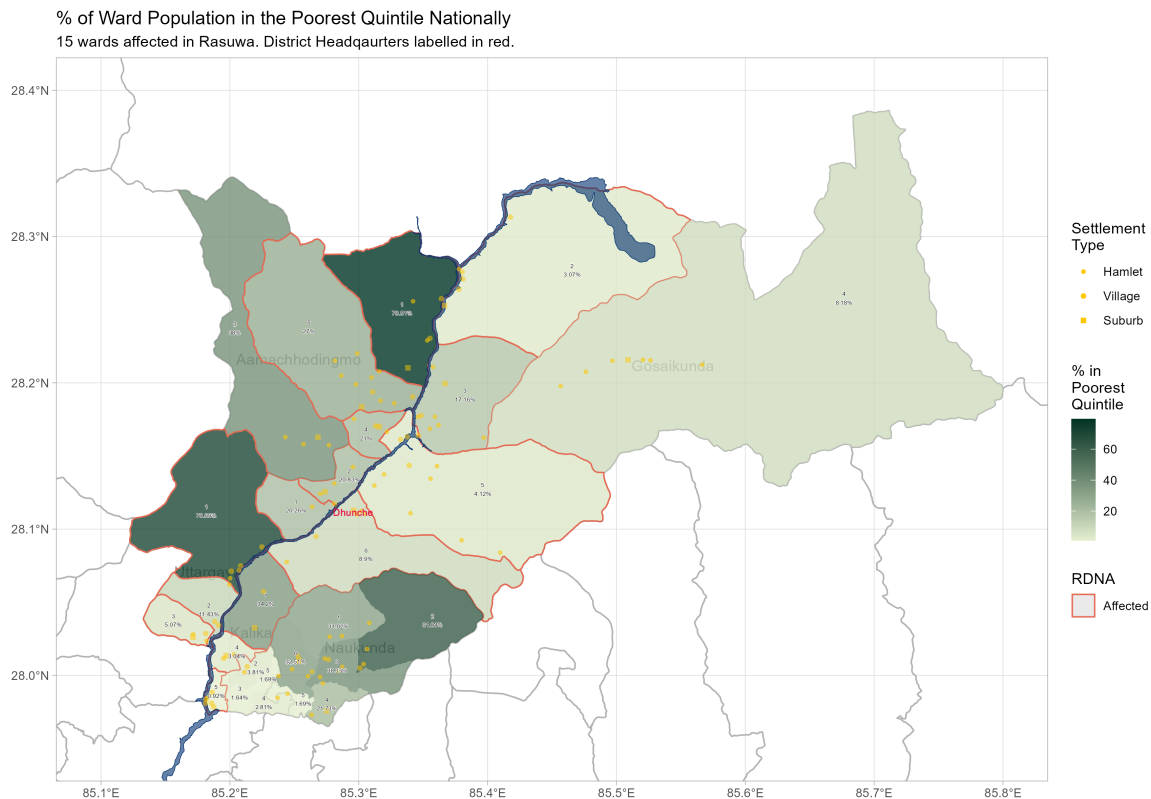

The [population](#) of Rasuwa district is 23,430.

Of the 27 wards in Rasuwa district, 15 have been affected by the flooding, according to the NDRRMA.

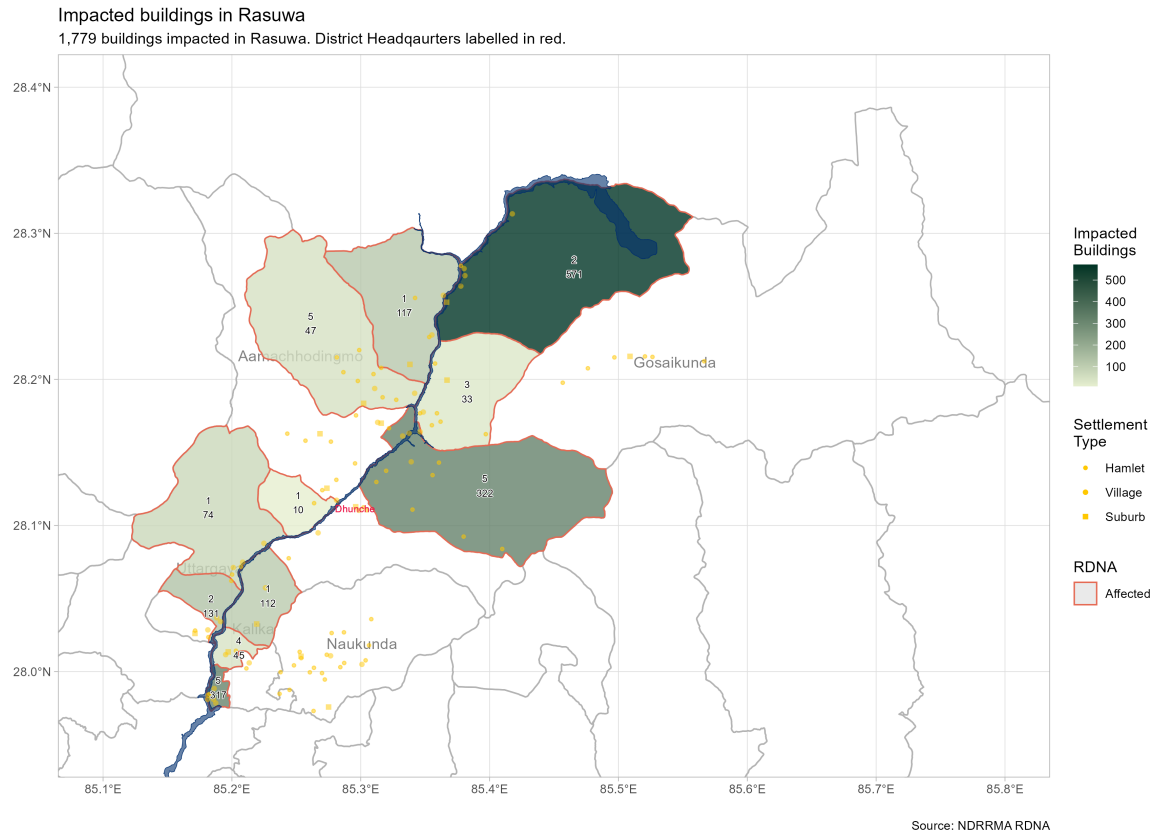

With reference to the plot below, 20% (2,225) out of the 11,131 [households](#) in Rasuwa are in the poorest quintile nationally, in line with the average for Nepal. Of the affected wards,

Gosaikunda-1 and Uttargaya-1 are of particular concern, given the particularly high percentages of their populations who are in the poorest quintile nationally.

As of the 2021 Census, there were 1,290 people with disabilities in the district, though it should be noted that this figure relies on self-reporting, so the actual number might be much higher.

Needs

Based on the NDRRMA Rapid Disaster Needs Assessment, 1,779 buildings were damaged in the floods. This damage to housing private buildings has affected 7,634 people.

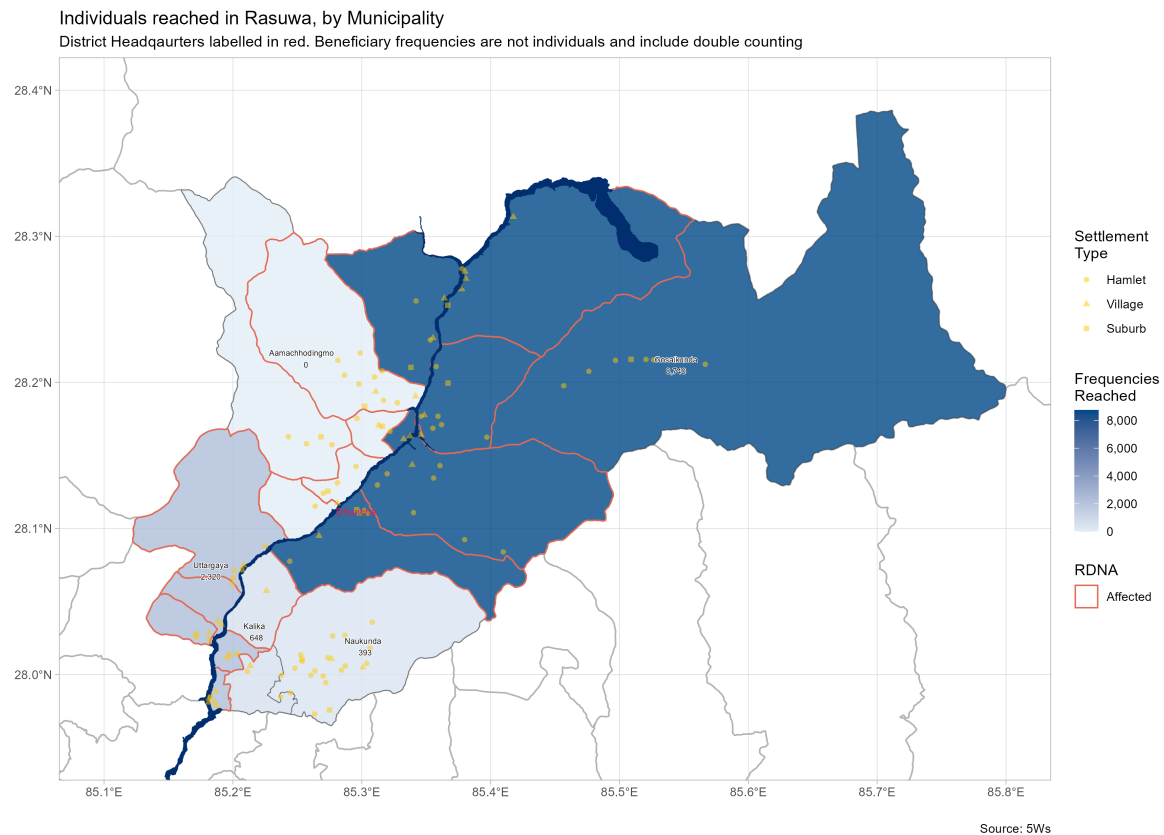

Gosaikunda-2 received, by far, the most damage to its land area. However, agricultural employment in Gosaikunda-2 was quite minimal at 8% of the employed population. This is in contrast to 46% across the rest of the municipality and 68% for the rest of the district.

It should still be noted that businesses and households in Gosaikunda experienced the most damage and losses out of all the affected municipalities in Rasuwa, with only Bidur reporting greater damage and losses (Bidur's population is far greater) across all the flood-affected areas.

Table 1: Economic impacts and losses in Rasuwa

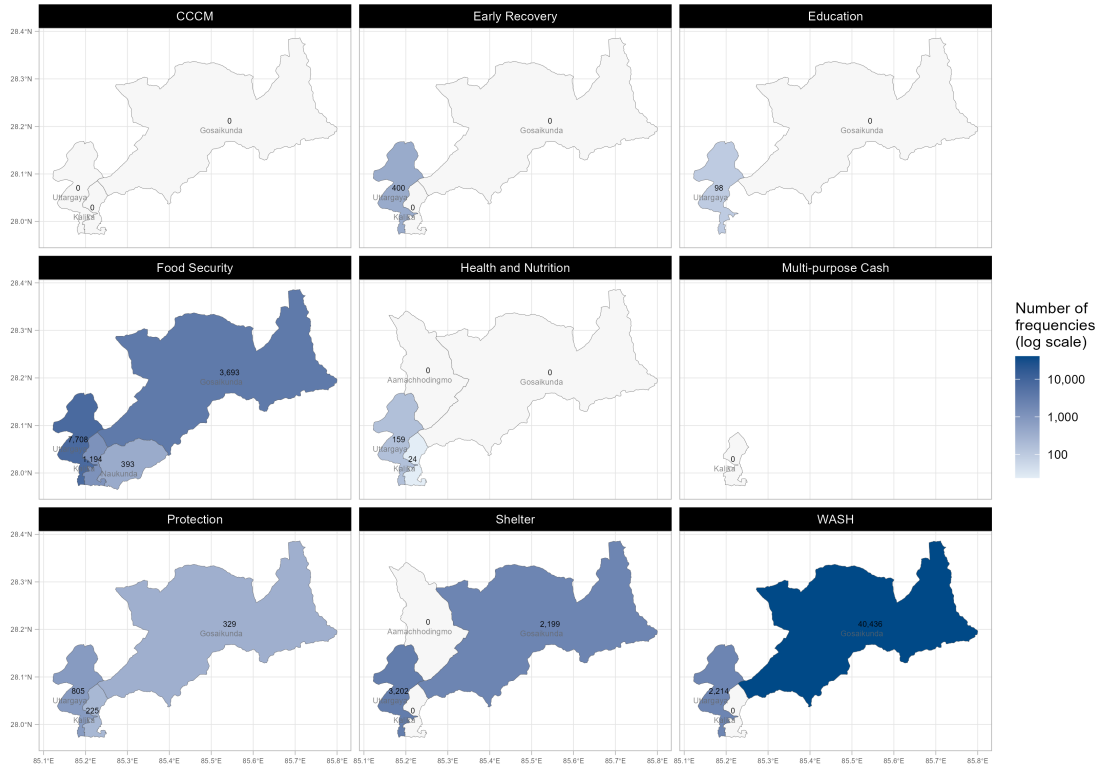

municipality	Businesses_affected	Total_damage_incl._households_assets_npr_crore
Gosaikunda	338	1030.70
Uttargaya	258	411.60
Kalika	303	88.78
Aamachhodingmo	107	37.18

Response

The majority of the individuals reached have been in Gosaikunda. However, as we can see from the beneficiary frequencies map below (which is inclusive of double counting, and thus indicative of where agencies have focused their resources), affected persons in Gosaikunda have been reached primarily by WASH activities.

Number of Beneficiary frequencies reached, by municipality
As of 20260914, from the 5Ws; includes double counting

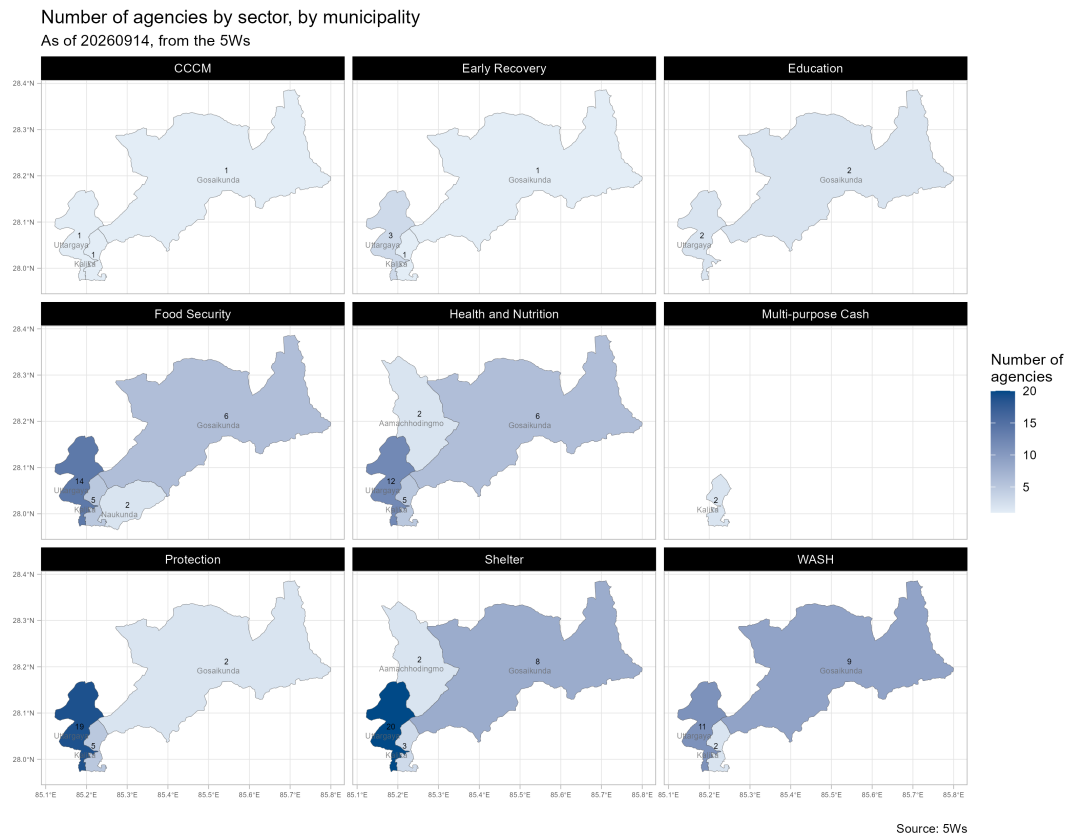

We still lack more granular data. As can be seen from the table below, almost none of the activities in Gosaikunda have been reported at ward level. Uttargaya is the municipality with the best ward-level reporting. 2,958 beneficiary frequencies (inclusive of double counting) have no municipality reported at all. Without ward-level data, it will not be possible to tell on which side of the river activities have occurred.

Table 2: Ward-level reporting of beneficiary frequencies

municipality	no_ward	ward_reported	pc_with_ward
Aamachhodingmo	0	0	0.00
Gosaikunda	45782	875	1.88
Kalika	1218	225	15.59
Langtang National Park	0	0	0.00
Naukunda	393	0	0.00
Uttargaya	8482	6894	44.84
NA	2958	0	0.00

Agency presence

Sector presence, however, tells a very different story from where beneficiary frequencies were reached. Somewhat commonsensically, agency presence is highest in Uttargaya, the most accessible part of the district. It should also be mentioned that Dhunche, the district seat and the location of the District Administration Office, is located in the lower reaches of Gosaikunda.

Agencies by municipality			
district	municipality	num_agencies	agencies
Rasuwa	Aamachhodingmo	3	CBM, KOSHISH, HRDC
Rasuwa	Gosaikunda	24	AWO International, CARDSN, CBM, KOSHISH, HRDC, CMC-Nepal, GEI ASIA, HAPSA Nepal, IOM, PLAN, DEPROSC Nepal, SCoN, UNDP, UNFPA, UNICEF, WFP, WHH, ASN, RRN, WHO, LG, WVI, KIRDARC Nepal, AH&H
Rasuwa	Uttargaya	40	ActionAid, ADRA, GCYCN, BN, CARE Nepal, CSRC, CBM, KOSHISH, HRDC, CIN, UNICEF, CMC-Nepal, CRS, Caritas, Fastenaktion, WJR, HELVETAS Nepal, CWIN, FAO, GEI ASIA, Habitat for Humanity, HAPSA Nepal, IOM, IRW, PIN, PLAN, DEPROSC Nepal, Save the children, SCoN, Shanti Foundation, TPO, UN Women, ROYM, UNDP, UNFPA, NRCS, WHH, RRN, WVI, KIRDARC Ne
Rasuwa	Kalika	15	CBM, KOSHISH, HRDC, CMC-Nepal, UNICEF, CWIN, IOM, IRW, PLAN, DEPROSC Nepal, UNDP, WFP, WHH, RRN, LG
Rasuwa	Naukunda	2	WVI, KIRDARC Nepal
Rasuwa	Langtang National Park	1	WFP

References and useful datasets

Consolidated Census ward-level household and population

Variables include a breakdown of housing materials, wealth quintile, school attendance and household WASH.

Logistics Cluster Access Map

Work is ongoing.

Geodata

Includes ward-level shapefiles and settlement points.
